

ProfileSolutions

LEAK DETECTION + AUTOMATION TECHNOLOGY

ALUMINIUM PROFILE & ACCESSORIES

Our aluminium profiles are manufactured using high grade A6N01S-T5 aluminium and provided with longitudinal slots used to house nuts and specialised connection systems enabling easy but strong connections with adjacent profiles, brackets or anything else.

Used for machine structural frames, conveyors, workbenches, shelving systems etc. The possibilities are endless, limited only to your imagination.

This catalogue exhibits the basic range of profile and accessories. For further information and detailed specifications please contact Profile Solutions.

Profile and Slot Detail

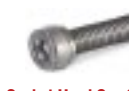

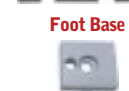

PROFILE DEFLECTION UNDERLOAD DATA

Method:

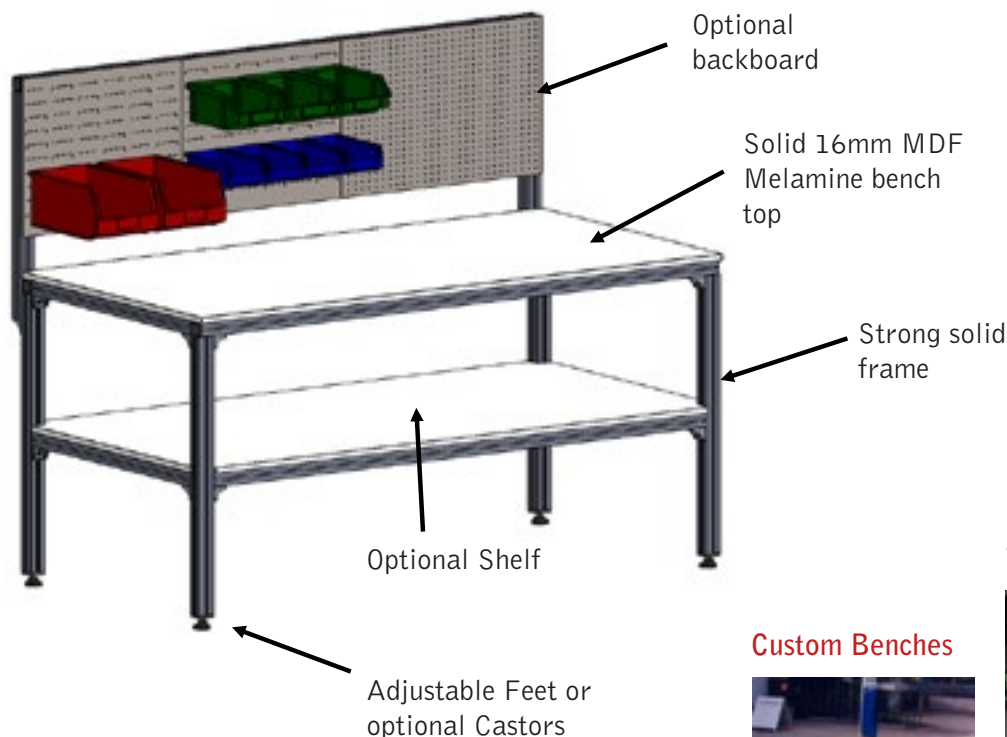

1. Obtain **P** and **L** values and project a line to get point "a" on the graph.
2. Obtain **W** and project a line from point "a" to get point "b" on the graph.
3. Extend the line horizontally to the corresponding support method.
4. Read the value which is the amount of deflection the beam with exhibit.
